LOHITH SAI G

Bengaluru, Karnataka | +91 9380324074 | Lohithsai0808@gmail.com

Summary

Full-stack developer with hands-on experience in frontend and backend development using React.js, Node.js, Express.js, Firebase, and MongoDB. Experienced in Flutter mobile development and real-time systems using WebRTC and peer-to-peer communication. Interested in solving practical problems, building software projects, and transforming ideas into real-world applications.

Experience

MERN Stack Developer Intern
QSpiders, Hebbal, Bengaluru
Responsibilities

- Completed internship training focused on MERN stack development.
- Worked with React.js for frontend development and application components.
- Practiced backend development using Node.js, Express.js, and MongoDB.
- Developed and integrated frontend and backend components for full-stack applications.

Skills

- **Languages:** JavaScript, SQL, Dart
- **Frontend:** HTML, CSS, React.js
- **Backend:** Node.js, Express.js, Middleware Handling, Routing
- **Databases:** MongoDB, Firebase Firestore
- **Concepts:** Asynchronous Programming, Error Handling
- **Networking:** WebRTC, Socket Programming, Peer-to-Peer Communication
- **Tools:** Git, GitHub, GitHub Copilot, Cursor

Certifications

- MERN Stack Development Intern - QSpiders, Hebbal

Education

B.Tech in Information Science Engineering **2026**
Brindavan Group of Institutions, Bengaluru

2nd PUC **2022**
Government College, Yelahanka

Projects

Offline LAN Call - P2P Voice & Video System **2025**

- Built a peer-to-peer voice and video calling system using WebRTC without internet dependency.
- Designed LAN-based architecture enabling real-time communication between devices on the same network.
- Developed a cross-platform mobile application using Flutter for Android and iOS.
- Optimized communication flow for low-latency local performance.

TTD Booking Assistant - Chrome Extension **2026**

- Developed a Chrome extension to simplify pilgrim-detail entry and booking workflows on the TTD booking portal.
- Implemented automatic detection and mapping of booking form fields for pilgrim and general details.
- Added support for multiple pilgrim profiles and group selection for faster form filling.
- Built using TypeScript, React, Vite, and Tailwind CSS with Manifest V3.

ReMIND - Dementia Care Ecosystem **2025**

- Developed a dementia care ecosystem consisting of patient, caretaker, and family applications using Flutter and Firebase.
- Implemented face-recognition-based authentication using TensorFlow Lite for secure on-device login.
- Integrated SOS alerts, medication reminders, and real-time synchronization using Firebase Realtime Database.
- Utilized Cloudflare R2 for multimedia storage and memory playback features.

Awards

- **1st Prize - IEEE National Conference Best Project Award, 2025**
  ReMIND - Dementia Care Ecosystem
- **1st Prize - IEEE College-Level Final Year Project Exhibition, 2025**
  ReMIND - Dementia Care Ecosystem
- **1st Prize - Best Idea Presentation Award, IEEE & AICET Ideathon, 2025**
  LAN-Based Offline Communication System for Large-Scale Group Coordination

Languages

English **Hindi** **Kannada**

Hobbies and Interests

- Dancing
- Singing
- Listening to Music
- PC Gaming
- **Professional interest:** Transforming ideas into practical real-world software projects.
